

I hope you reject the petition 04-160. I pay a monthly service fee fo this service and should be able to here what I would liek to hear and have the variety that I want. If you limit XM's ability to provide as much information as possible then they are not truely able to compete. I tis the same with the satilite tv and how it is so difficult for them to have local stations. you have limited their ability to compete and given the regular stations the unfair advantage. XM and Dish have great platforms and are using new technologies and they should be punished for their innovation.
